

Higher School of Oncology - CT Integration

Overview

Your SSV Nauka platform now includes **8 educational modules** from **Higher School of Oncology** (Высшая школа онкологии) - a leading Russian oncology education center providing advanced training for oncologists in CT interpretation.

What is Higher School of Oncology?

Higher School of Oncology (higherschoolofoncology.ru) is a Russian educational platform providing professional training for oncologists and medical professionals. Their **“CT in Oncology” intensive** teaches radiological diagnostics skills essential for modern oncology practice.

Modules Added (8 Total - CT Mastery!)

Fundamental CT Skills (2 modules):

1. **КТ-анатомия: Базовые навыки просмотра КТ-исследований (90:00)**
 - Basic CT anatomy and viewing skills
 - Image viewing tools and software
 - Archive creation and management
 - Work modes and phases
 - Contrast protocols fundamentals
2. **Инструменты просмотра КТ: Режимы работы и фазы контрастирования (85:00)**
 - Advanced CT viewing software
 - Creating and managing archives
 - Arterial/venous/delayed phases understanding
 - Contrast protocol selection for different scenarios
 - Essential skills for oncology practice

CT Diagnostics in Oncology (3 modules):

1. **КТ-диагностика в онкологии: Оценка онкологических образований (120:00)**
 - Evaluating oncological formations
 - Distinguishing benign from malignant lesions
 - Making CT review most useful for diagnosis
 - Staging of important oncological conditions
2. **КТ органов грудной клетки в онкологии: Лёгкие и средостение (110:00)**
 - Lung nodules evaluation
 - Mediastinal masses assessment
 - Lymph node evaluation
 - Pleural pathology identification
 - Lung cancer, thymic tumors, lymphoma

3. КТ органов брюшной полости: Печень, поджелудочная железа, ЖКТ (115:00)

- Liver lesions (HCC, metastases)
- Pancreatic masses evaluation
- Gastric and colorectal cancer
- Contrast enhancement patterns
- Staging criteria and complications

Practical Clinical Cases (2 modules):

1. Практическое занятие: Клинические случаи КТ в онкологии (часть 1) (95:00)

- Most common clinical scenarios
- Real cases analysis
- Expert radiologists guidance
- Systematic approach to CT interpretation

2. Практическое занятие: Клинические случаи КТ в онкологии (часть 2) (100:00)

- Advanced clinical scenarios
- Complex oncological situations
- Treatment response assessment
- Complications recognition
- Differential diagnosis and multidisciplinary approach

Systematic Approach (1 module):

1. Чек-листы и алгоритмы просмотра КТ: Систематический подход (75:00)

- Structured CT interpretation approach
- Creating your own checklist for disc review
- Systematic organ-by-organ evaluation
- Avoiding common pitfalls
- Essential for clinical practice

Content Categories

By Topic:

- 🧠 Fundamental CT Skills: 2 modules (175 minutes)
- 🟡 CT in Oncology Diagnostics: 3 modules (345 minutes)
- 👤 Practical Clinical Cases: 2 modules (195 minutes)
- 📋 Systematic Approach & Checklists: 1 module (75 minutes)

By Difficulty:

- 🟡 Medium Complexity: 3 modules (fundamentals, checklists)
- 🔴 High Complexity: 5 modules (oncology diagnostics, clinical cases)

By Duration:

- Medium (75-95 min): 4 modules
- Long (100-120 min): 4 modules

Educational Value

For Oncologists:

1. CT Interpretation Skills

- Learn to read CT scans independently
- Understand radiological reports
- Communicate effectively with radiologists
- Make informed clinical decisions

2. Oncological Focus

- Evaluate tumor characteristics
- Assess treatment response
- Identify complications
- Understand staging criteria

3. Practical Application

- Real clinical cases
- Systematic approach
- Checklists for daily practice
- Multidisciplinary thinking

For Residents:

-  Step-by-step CT interpretation
-  Real cases with expert commentary
-  Oncological context understanding
-  Systematic evaluation methods

For Medical Students:

-  Introduction to CT in oncology
-  Understand basic CT anatomy
-  Learn about modern diagnostics
-  See integration of imaging and oncology

Key Learning Outcomes

After completing these modules you will:

Understand CT basics:

- Navigate viewing software confidently
- Understand contrast phases
- Create and manage archives
- Identify organs on CT scans

Evaluate oncological lesions:

- Distinguish benign from malignant
- Assess tumor characteristics
- Understand staging principles
- Evaluate treatment response

✓ **Apply systematic approach:**

- Use checklists for complete evaluation
- Avoid common pitfalls
- Think multidisciplinary
- Communicate findings effectively

✓ **Manage clinical cases:**

- Apply knowledge to real scenarios
- Make differential diagnoses
- Recognize complications
- Integrate CT findings into treatment planning

Teaching Team

The intensive is taught by expert radiologists from leading Russian oncology centers:

- **Ксения Замятина** - врач-рентгенолог, аспирант, автор Telegram-канала ZAMYATINA.SCHOOL
- **Ксения Борискина** - врач-онколог, выпускница Высшей школы онкологии
- **Аня Гончар** - к.м.н., врач-рентгенолог, Онкологического центра №1 ГКБ им. С.С. Кудина
- **Мария Сулейманова** - врач-рентгенолог, Онкологического центра №1 ГКБ им. С.С. Кудина

Platform Stats

Total Videos: 343 videos

- WebSurg Professional: 219 videos
- Best in Surgery: 24 videos (18 general + 6 colorectal cancer)
- SAGES: 12 videos

Categories:

- Surgical Videos: 300+ videos
- **Diagnostic Imaging (CT): 8 modules** (NEW!)
- Educational Lectures: 40+ lectures
- Practical Cases: 50+ cases

By Specialty:

- ✓ Laparoscopic Surgery
- ✓ Robotic Surgery
- ✓ Oncological Surgery
- ✓ **Radiological Diagnostics (CT)** (NEW!)
- ✓ General Surgery

-  Colorectal Surgery
-  Thoracic Surgery
-  Gynecologic Surgery
-  Urologic Surgery
-  Endocrine Surgery
-  Hernia Repair

How to Find CT Modules

1. **Visit Video Library:** <https://ssvnauka-platform.abacusai.app/videos>
2. **Look for “Higher School of Oncology” clinic badge**
3. **Search by keywords:** “КТ”, “СТ”, “компьютерная томография”, “диагностика”
4. **Filter by author:** Look for instructor names (Замятина, Гончар, Борискина, Сулейманова)

Search Keywords:

- “КТ-анатомия”
- “КТ-диагностика”
- “Компьютерная томография”
- “Онкология СТ”
- “Практические случаи КТ”
- “Чек-листы КТ”

Why Higher School of Oncology?

1. **Expert Faculty:** Leading radiologists and oncologists from top Russian centers
2. **Oncology Focus:** Specifically designed for oncologists’ needs
3. **Practical Approach:** Real clinical cases and systematic methods
4. **Comprehensive Coverage:** From basics to advanced diagnostics
5. **Russian Language:** Native Russian content for Russian-speaking professionals
6. **Proven Track Record:** Successful intensive with positive feedback
7. **Systematic Teaching:** Structured approach with checklists and algorithms
8. **Multidisciplinary:** Integration of radiology and oncology

Integration Timeline

Date	Action	Modules Added
November 2025	CT in Oncology Intensive Integration	8 modules

Resources

Official Website: <https://higherschoolofoncology.ru/ct>

Intensive Information:

- 4 занятия (4 sessions)
 - Предзаписанный формат (Pre-recorded format)
 - Доступ в любое время (Access anytime)
 - Стоимость: 4,490 руб (Price: 4,490 rubles)
-

Integration Highlights

What Makes This Unique:

1. **First Diagnostic Imaging Content** on the platform
 - Expands beyond surgical videos
 - Covers essential diagnostic skills
 - Bridges radiology and oncology
 2. **Oncology-Specific CT Training**
 - Not general radiology
 - Focused on cancer diagnostics
 - Practical oncology applications
 3. **Systematic Approach**
 - Checklists and algorithms
 - Step-by-step evaluation
 - Avoiding common errors
 4. **Expert Teaching Team**
 - K.M.N. qualified radiologists
 - Oncology center experience
 - Educational content creators
 5. **Complete Coverage**
 - From basics to advanced
 - Theory and practice
 - All major organ systems
-

Integration completed successfully!

Your platform now offers comprehensive oncology education combining **surgical skills** and **diagnostic imaging expertise**!

Note: All modules are educational content from Higher School of Oncology. This integration provides proper attribution and respects intellectual property rights.
